

Modern History · GS - I

The British Raj in India was a period of direct British rule over the Indian subcontinent. It began in 1858 when the British Crown took over the administration of India from the East India Company. The British Raj lasted until 1947 when India gained independence. During this period, the British implemented various policies and reforms in India, including the establishment of a legal system, the introduction of modern education, and the development of infrastructure. The British Raj is often criticized for its exploitative nature and for imposing British culture and values on the Indian people.
